

InnovX Gate opener Kits comes with a set of remote controls with 100 mts operational range along with drive mechanism and installation instructions. Any trained technician like fabricators, masons, electricians etc. can install this. Further call centre support also available. This allows you to open / close front gates or garage doors remotely from inside the house or from car thus allowing you to have safe hassle free entry / exit at all times and in all weathers. Equipment can be installed on the gate and garage doors with minimum alterations.
