

## Pallet Parking

**InnovX** Car parking stations are designed to eliminate the current parking problems faced at various places. This is the best solution for a safe, trouble free & tension free way of covered car parking. InnovX car parking stations are designed to use minimum area to park maximum cars possible. This design is in such a way that cars can be packed in to open areas indoor as well as outdoor by sliding the cars on pallets thus saving space for driveways and and vehicle access.
