

## Indexed Parking

### A Fully Automatic Stylish Parking Solution for 4 Wheelers

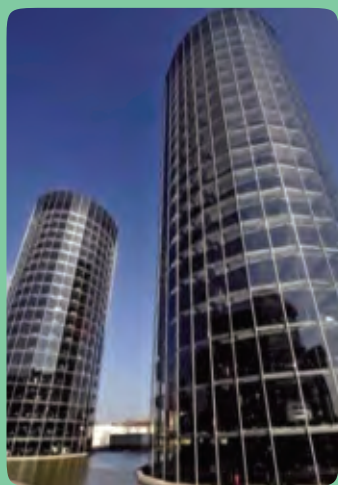

Automatic storage and retrieval system using a car elevator with turn table which moves vertically with the cars in upward and downward direction and a transfer device on platform for the horizontal movement.

InnovX Car parking stations are designed to eliminate the current parking problems faced at various places. This is the best solution for a safe, trouble free & tension free way of covered car parking. Our car parking stations are designed to use minimum area to park maximum cars possible. The design is in such a way that cars can be stacked up to a height of 150 feet by using minimum floor area, saving a lot of space for other activities.
